Personal Projects

-Personal Portfolio

2026

Animated full-stack personal portfolio with AI-assisted interactions

Live | GitHub

- Tools & technologies used: HTML, CSS, JavaScript, GSAP, Node.js, Express.js, Gemini API
- Built a responsive portfolio to present academics, skills, coding profiles, projects, and contact details in a polished interface.
- Implemented scroll-triggered GSAP animations, interactive sections, and backend support using Node.js and Express.js.
- Integrated Gemini API features for AI-assisted interaction/content flow and deployed the project on Vercel.

-Gojo Hollow Purple - Real-Time Hand Tracking VFX

2026

Collaborative computer vision project with Namkar Jindal

GitHub

- Tools & technologies used: Python, OpenCV, MediaPipe, NumPy
- Developed a real-time computer vision application inspired by Gojo Satoru's Hollow Purple using Python, OpenCV, MediaPipe, and NumPy.
- Implemented gesture-controlled hand tracking, fingertip attachment, and pinch-based projectile launch using MediaPipe hand landmarks.
- Designed procedural visual effects featuring plasma rendering, particle systems, motion trails, dynamic bloom, and cinematic explosion animations.
